Graphs and Combinatorics is an international journal devoted to research concerning all aspects of combinatorial mathematics. In addition to original research papers and survey articles, the journal also features short communications, research problems, and announcements. As particular attention is being paid to rapid publication, researchers not only rely on **Graphs and Combinatorics** to keep them informed of current developments but also use it as a forum for publicizing their own work.

When preparing the manuscript, please read the "Instructions to Authors," located at the end of No. 1 issue.

Manuscripts and inquiries should be directed to the Managing Editor:

Tel. (0463)58-1211 (ext.) 3224

Fifty offprints of each paper are supplied free of charge. Additional copies may be ordered at cost price when the proofs are returned.
